

[April-2019-NewDownloading Free 200-310 Dumps PDF VCE Dumps from Braindump2go

2019/April Braindump2go Cisco CCDA 200-310 DESGN Dumps with PDF and VCE New Updated Today! Following are some new 200-310 Exam Questions:1.|2019 Latest 200-310 Exam Dumps (PDF & VCE) Instant

Download:<https://www.braindump2go.com/200-310.html> 2.|2019 Latest 200-310 Exam Questions & Answers Instant

Download:<https://drive.google.com/drive/folders/0B75b5xYLjSSNbmNsWnFEczRBdU0?usp=sharing> New Question

Which two characteristics are advantages of the top-down approach to network design? (Choose two.)A. Generally is the fastest approachB.

The resulting design is optimized for the business requirements of the organization.C. The designer can delay testing until the end of the projectD. The resulting design can meet both current and future requirementsE. Does not require a thorough initial need analysis

Answer: BENew QuestionWhich two types of files are the most common used in APIs for programmability? (Choose two.)A. HTMLB. PERLC. BASHD. JSONE. XML

Answer: AENew QuestionWhich advantage of using Spanning Tree Protocol is true?A. utilizes all available uplink bandwidthB. allows fast convergence after failure of a link or deviceC. allows dual-homed servers operate in active-active modeD. prevents network loops

Answer: DNew QuestionA customer is questioning the additional infrastructure that is needed to design a three-tiered, hierarchical network. Which feature is a benefit of the distribution layer in a traditional design?A. creates access layer resiliencyB. isolation of faults between the access and core layersC. extends the Layer 2 and Layer 3 boundary to the core layerD. provides additional security services against unauthorized access

Answer: BNew QuestionAn engineer must build an enterprise network that can operate with a limited amount of employees.

In which two ways can the engineer use the Cisco Design Lifecycle? (Choose two.)A. ManageB. shareC. learnD. operateE. build

Answer: ACNew QuestionWhich type of WAN connection do you use for a low-latency application that is only available across a WAN?A. IPsec over the InternetB. MPLS VPNC. dialupD. unencrypted GRE over the Internet

Answer: BNew QuestionA customer is deploying a centralized communications infrastructure to a small remote construction site that has satellite-based Internet connectivity if the expected latency is about 500 ms, which description of the user experience is true?A.

minimal delay and conversation overlapB. Phones will not complete registration to the centralized clusterC. significant delay and conversation overlapD. no delay or conversation overlap

Answer: DNew QuestionWhat occurs to traffic when a Cisco APIC is removed from the data path of a Cisco ACI?A. The fabric continues to forward the traffic.B. The traffic is lost during convergenceC. The traffic is queued during convergenceD. The fabric reroutes the traffic to another APIC

Answer: ANew QuestionWhich network size can provide six /25 subnets while wasting the smallest number of IP addresses?A. 19B. 16C. 22D. 23

Answer: DNew QuestionWhich feature enables the VRRP-enabled router to regain the master VRRP status upon recovery from a failure?A. trackingB. preemptionC. delayD. priority

Answer: ANew QuestionRefer to the exhibit. Which result is true if a client computer connects through the interface named Internal and attempts to connect to an operational tcp/443 based website?A. A captive portal is displayed which enables guest access layer.B. The traffic passes while alerting the logging system with the Emergencies event level.C. The traffic passes and displays the website content.D. The website connection times out

Answer: ANew QuestionWhich network element must be summarized in a multiarea OSPF deployment?A. IP addressB. number of routesC. communitiesD. link state advertisements

Answer: ANew QuestionAn engineer is designing a new modular network topology. What is one advantage to using a hierarchical design?A. It supports unequal cost paths.B. It provides additional fault tolerance.C. It enables the network to scale.D. It manually controls failover.

Answer: DNew QuestionBased on best practices which QoS profile should be configured on the WLAN of the WLC for wireless VoIP communications?A. PlatinumB. BronzeC. SilverD. Gold

Answer: ANew QuestionWhen designing a high availability network, which option can be classified as a fault domain?A. single power supply devices in a network designB. nonredundant devices in the network designC. every tier in the network designD. collapsed core in a network design

Answer: CNew QuestionRefer to the exhibit. Which action can be taken in this network design to make it more resilient? A. Add carrier redundancyB. Add additional Layer 2 trunks between core/distribution switchesC. Add additional Layer 2 trunks between access switchesD. Extend Layer 3 connectivity to access layer using dynamic routing protocol

Answer: ANew QuestionWhile preparing an overview of Internet facing DMZ for a customer, a consultant must identify the functionality to be placed in the DMZ. Which two functionalities are best suited for use in a DMZ? (Choose two.)A. enterprise NTP sourceB. DDOS protectionC. remote access VPN terminationD. web load balancerE. web security appliance
